

Unemployment Claim Fraud

Provide your employees with the most powerful, comprehensive identity theft protection.

With unemployment hitting record numbers, cybercriminals have found a new target: unemployment claim (UC) fraud. And while UC fraud impacts employers, it also has a significant, lasting impact on employees. Finding out that they are a victim of UC fraud can be stressful. Resolving the claim can be confusing and time-consuming. Plus, once their personal information has been compromised, continuing to monitor their identity and finances for additional threats can be overwhelming.

Aura™ Identity Guard® is here to help your employees.

- ▶ Resolve UC fraud.
- ▶ Provide identity and credit monitoring.
- ▶ Reduce the possibility of future fraud events.
- ▶ Provide ongoing protection from fraud to help achieve personal and financial goals, like buying or renting a home, paying for education, and saving for retirement.

To help your employees address potential unemployment fraud, Thomas & Company has created a preferred partnership with Aura™ Identity Guard® - a leader in identity theft protection and digital security - to assist in responding to fraudulent claims and provide ongoing fraud prevention.

Employees will receive a **dedicated Case Manager** who will be their single point of contact and help them every step of the way.
